# KEY FEATURES

## YOUR FAX NUMBERS

If your business is focused on local clients, AFAX™ local fax number is an effective communication tool to inspire customers to contact you.

We almost able to provide a local fax number within Canada using our major telecom service providers like Primus Telecommunications Canada and Allstream Inc. This would give us an ability to serve you and your business with extended flexibility and reliability of service.

We also provide an option to port over your Fax number to us, this means if you already have a Fax number and would like to continue using that, we simply could request LNP on your behalf without any disruption to your business. Please contact us if you could not find your local area code within are available pool of Fax numbers or if you need more information on how to transfer your existing local fax number to AFAX.

Extend your customers footprint, give your business a National visibility with a Toll Free Fax Number from AFAX™

You don't have to be a large organization to take advantage of national fax numbers. Let your customer to reach you from anywhere in Canada and USA with no extra cost.

Through our trusted carriers we are able to provide you vanity Toll-Free number per request (when its available), please reach our customer care specialist if you need any additional information.

## INTEGRATE SENDING FAX IN YOUR WAY

We understand the importance of our client's business, we know your inquiries may vary to keep and store your documents in different secure storage.

At AFAX, we are able to integrate with major cloud service providers to facilitate storing your Fax documents while sending and receiving them by using our platform.

Here is the short list of providers which we could build a customize integration

- Google Drive
- OneDrive
- Amazon S3
- Azure Blob
- Azure Files
- Dropbox and much more

We provide a peace of mind to our clients when sending FAX using our platform. Our PHIPA compliance safeguards that all your health information will be completely secure.

We advance to protect your FAX document and information with SSL/TLS encryption during the transit and unique data encryption at reset.

We have implemented our infrastructure and network in Canadian borders, including our telecom vendors to send and receive your FAXes using public switched telephone network (PSTN).

All data is stored in our facilities and data centers located in Toronto, Ontario and all security measures are implemented by our engineers and strategic vendors to protect the data and eliminate unauthorized access to any information including **PHI**.

## FAXING FROM YOUR COMPANY EMAIL

Our goal is to give our customers more flexibility, agility and mobility when technology is available.

Our software engineers came with an innovation secure way for AFAX™ customers to use their existing emails and email client tool to send their fax documents.

Such a comprehensive and unique feature for:

- Travelers, using smart phone or notebook to simple send your faxes.
- Business with multiple staff, let each employee to use their own email to send their faxes from anywhere.
- Business with multiple locations, simply add an email addresses to your account – let the Fax begin from that email in a matter of seconds.

To find more information on that by looking at tutorial videos and samples, or find more info in our website FAQ.

## UNIQUE SECURITY

Security is one of the most important measure for any business, in AFAX Platform we went above and beyond the norm and have been implemented a unique security measures to protect our customers data and privacy.

We have used most trusted vendors to build safeguard to protect and secure our infrastructures and our software engineers came with unique algorithm to encrypt Fax documents while on reset.

We expect our customers to do their part for protecting their information and assets, like using complex password and don't share their credential with anyone else.

If you have any question in respect to this, please take a look at our FAQ and/or drop us an email.
